

Scalable Scientific Workflows on ReCaS HPC Infrastructure for Medical Physics

Conferenza: INFN Workshop on Applied Computing and Big Data

Relatore: Dott. Domenico Diacono | Data: Novembre 2021

Punti Chiave della Presentazione / Slide Highlights:

- * Architecture of the ReCaS Bari data center: hybrid CPU/GPU clusters and storage tiers.
- * Distributed pipeline automation with Slurm and Singularity containers for medical AI.
- * Petabyte-scale data management conforming to FAIR data principles.
- * Performance benchmarks: 10x training speedup for deep learning neural networks.
