

Quantitative Radiomic Analysis for Lung CT Nodule Classification

Conferenza: European Congress of Radiology ECR - Vienna

Relatore: Dott.ssa Marianna La Rocca | Data: Marzo 2023

Punti Chiave della Presentazione / Slide Highlights:

- * High-throughput radiomic feature extraction from low-dose computed tomography (LDCT).
- * 3D volume segmentation and benign vs malignant discrimination on LIDC-IDRI datas et.
- * Reduction of false positive rate to less than 1.5 false nodules per full scan.
- * Integration into open-source clinical decision support workflows.
